

# MUZE

## How to prepare a printfile in Photoshop

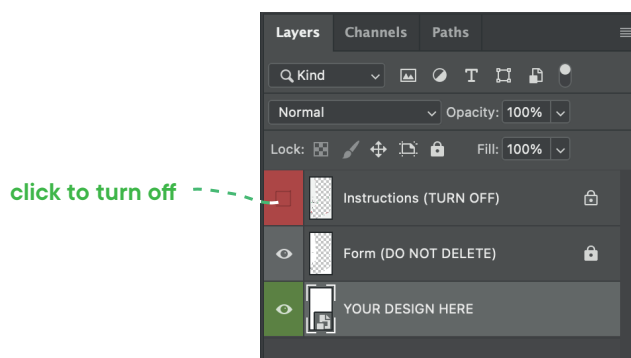

Open the MUZE template for the product you need.

Find the layer in your document called "**YOUR DESIGN HERE**" and double click on it.

In the layer that opens, add your design, then click "**SAVE**" and go back to the template with the product.

If you are satisfied with everything, turn off the layer named "**Instructions (TURN OFF)**".

After that, **save** your file giving it your name.  
Your file is ready to be uploaded to our editor on the website.

### RESOLUTION

Graphics must have a resolution of 300 dpi (recommended).  
Minimum 150 dpi.

### FILE FORMAT

Acceptable formats: JPG, PNG, TIFF (flattened).
